WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

No. 1. VOL. C2. WEEK ENDED SATURDAY, 2ND JANUARY, 1965. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 370 — 189 boys and 181 girls.

The number of deaths registered of persons normally residing in the principal towns was 195. Of these deaths, 29 were due to malignant neoplasms and 5 to tuberculosis. There were 2 accidental deaths, 1 of which was due to poisoning. There was 1 suicide.

Among the deaths of infants under one year, 2 were due to pneumonia, 1 to congenital malformation and 2 to prematurity.

The total number of births registered during the week in the principal towns was 763 — 396 boys and 367 girls, of which 174 boys and 145 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 335, of which 142 were registered in Dublin County Borough.

TABLE 1.—Births and Deaths registered during the week ended SATURDAY, 2ND JANUARY, 1965, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

NO. 8. VOL. C2. WEEK ENDED SATURDAY, 20TH FEBRUARY, 1965. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 321 — 145 boys and 176 girls.

The number of deaths registered of persons normally residing in the principal towns was 170. Of these deaths, 26 were due to malignant neoplasms. There were 2 accidental deaths, 1 of which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to prematurity, 2 to pneumonia and 1 to gastro-enteritis.

The total number of births registered during the week in the principal towns was 591 — 276 boys and 315 girls, of which 167 boys and 198 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 243, of which 141 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

May be obtained from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN 2.

NO. 27. VOL. C2. WEEK ENDED SATURDAY, 3rd JULY, 1965

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 472 - 237 boys and 235 girls.

The number of deaths registered of persons normally residing in the principal towns was 192. Of these deaths, 46 were due to malignant neoplasms, 2 to tuberculosis and 1 to influenza. There were 4 accidental deaths, 1 of which was due to a transport accident, 1 to drowning and 1 to accidental suffocation.

Among the deaths of infants under one year, 3 were due to prematurity, 3 to atelectasis, 3 to congenital malformation and 1 to birth injury.

The total number of births registered during the week in the principal towns was 1,124 - 593 boys and 531 girls, of which 236 boys and 223 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 342, of which 150 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

May be obtained from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN 2.

NO. 32 VOL. C2. WEEK ENDED SATURDAY, 7th AUGUST, 1965.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 369—196 boys and 173 girls.

The number of deaths registered of persons normally residing in the principal towns was 144. Of these deaths 30 were due to malignant neoplasms and 4 to tuberculosis. There were 3 accidental deaths, 2 of which were due to transport accidents and one to drowning.

Among the deaths of infants under one year, 2 were due to gastro-enteritis, 2 to prematurity, one to pneumonia and one to congenital heart disease.

The total number of births registered during the week in the principal towns was 707—364 boys and 343 girls, of which 229 boys and 210 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 220 of which 101 were registered in Dublin County Borough.

Table 1 - Births and deaths registered during the week ended Saturday 7th August, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN.

No. 37. VOL. C2. WEEK ENDED SATURDAY, 18TH SEPT., 1965. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 338 — 188 boys and 150 girls.

The number of deaths registered of persons normally residing in the principal towns was 145. Of these deaths, 29 were due to malignant neoplasms, 2 to tuberculosis and 1 to influenza. There were 2 deaths from transport accidents.

Among the deaths of infants under one year, 2 were due to congenital malformation, 1 to prematurity, 1 to leukaemia and 1 to bronchitis.

The total number of births registered during the week in the principal towns was 672 — 374 boys and 298 girls, of which 198 boys and 169 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 241, of which 148 were registered in Dublin County Borough.

TABLE 1.—Births and Deaths registered during the week ended SATURDAY, 18TH SEPT., 1965, which were assigned to the Principal Towns similar particulars for Belfast and Derry.

No. 42. VOL. C2. WEEK ENDED SATURDAY, 23RD OCTOBER, 1965. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week to persons normally residing in the principal towns was 383 — 178 boys and 205 girls.

The number of deaths registered of persons normally residing in the principal towns was 148. Of these deaths, 21 were due to malignant neoplasms and 3 to tuberculosis. There was 1 death from a transport accident and 1 from drowning.

Among the deaths of infants under one year, 2 were due to birth injury, 1 to pneumonia, 2 to congenital malformation and 1 to prematurity.

The total number of births registered during the week in the principal towns was 791 — 388 boys and 403 girls, of which 168 boys and 189 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 241, of which 127 were registered in Dublin County Borough.
